

Natural fibre scutching

Cretes is a leading manufacturer of processing systems for natural fibre stalks, with references in France, Holland, Romania, Lithuania, South Africa, Malaysia, Canada, etc.

Long fibre processing for textile applications is called scutching. Cretes has extensive experience with equipment for bast fibre processing.

Input of a scutching line for long fibre

- Round bales max. Ø1350 and max. 1200mm wide
- Stalk rolled up in layers with ropes in between
- Up to 3 metric tons per hour

Output

- Long textile grade fibres (less than 1% core)
 - rolled up in small, round bales
- Cleaned core (low dust and short fibre content) – in bulk
- Seed – in bulk
- Short fibre – baled
- Dust – in bulk
